Importance of Gum Health

Healthy gum is the foundation of healthy teeth. Healthy gums hold teeth in place at the root firmly. Poor gum care can lead to gum disease and tooth loss.

What is Gum Disease?

Gum disease is an infection of the gums, supporting tissues and bones which hold the teeth. It is caused by the build up of bacteria and dental plaque around the gums. Left untreated, it damages the gum tissues. Once gum tissues are damaged, the condition is irreversible.

Gum disease is infectious and can increase risk of other health conditions such as contribution to development of heart disease, increase risk of stroke, women's risk of pre-term births and diabetes. Many are unaware that gums bleed even with gentle toothbrushing is one of the early symptoms of gum disease. Other early symptoms include persistent bad breath, red & swollen gums and receding gums.
